EcoThrive Initiatives, Inc.

GRANT PROPOSAL

Approved projects must demonstrate new or improved access to potable water and/or adequate sanitation in the local community. The project shall also include ongoing service and maintenance to the new facility and create jobs in the local community. Grants are awarded without discrimination based on race, color, religion, national origin, gender, sexual orientation, or economic status.

The submitted grant proposal must include supporting documentation for the following information:

1. Demonstrated need for the project at the local community.
2. Describe the ability of the Grantee to achieve the established goals for quality and benefit to the community.
3. Describe the positive social benefit for the population in the project location.
4. A detailed action plan and timeline for completing the project, including the submission of inter reports at key stated milestones (no fewer than 2 interim reports) and at project completion.
5. Describe action plan to sustain the project beyond the completion, including services provided and job(s) created.
6. Identify a local resource for ongoing technical and business guidance.
7. Describe how the project will comply with local, regional, and national requirements.
8. Summarize the Grantee's knowledge of the local culture and requirements to improve water and/ or sanitation
9. List Grantee's experience in the water/ sanitation sector or describe the Grantee's capability to be trained in the technology.
10. Describe previous success in developing a business or serving the local population.
